

## LENSULTRA 60MM TELEPHOTO

Compact telephoto lens for portraits and professional zoom on your smartphone

REF : SC-LU-TL-060-23-EF

EAN : 0655729668040

EXISTS IN : BLACK

### DESCRIPTION :

Capture sharp, zoomed-in images with the LensUltra 60mm Telephoto — a premium mobile lens that provides true 2–5× optical zoom for iPhone and Android. Get natural bokeh, better compression, and impressive detail without the blur or noise of digital zoom. Take your mobile photography to the next level.

### STRENGTHS :

- Professional-quality portraits: natural compression and bokeh for more flattering portraits.
- Crisp optical zoom: get closer to details without noticeable loss of definition.
- High-quality optics: multi-coated glass that reduces flare, ghosting, and chromatic aberrations.
- Compact and lightweight design: easy to carry and use for spontaneous shoots or travel.
- Fast and secure mounting: easily attaches to ShiftCam systems and universal clips, with no complex setup required.
- Compatible with mobile workflows: ideal for social media photography and video, vlogs, and professional content.
- Premium and durable finish: metal construction with protected lenses, including caps and carrying case.
- Instant performance boost: turns your smartphone camera into a portrait focal length without heavy gear.

### CHARACTERISTICS :

- Efficient optical zoom from 2–5× to bring distant details closer without relying on digital cropping.
- Perfect for portraits, wildlife, and distant scenes: provides perspective compression that flatters subjects.
- Produces more pleasing portraits with controlled background blur and strong subject-to-background separation.

#### Optical design and performance

- 60 mm telephoto lens with an approximate 48° field of view.
- Very well-controlled distortion (~ -1%), delivering natural results with no noticeable deformation.

#### Materials and coatings

- Fluorite glass elements combined with an aluminum body for a balance of optical quality and lightness.
- Multilayer anti-reflective (AR) coating that improves contrast and reduces fogging, flare, and unwanted reflections.

#### Physical and focusing specifications

- Native magnification: 2× (effective optical range 2–5× depending on device combination).
- Minimum focusing distance: 30–40 cm.
- Total length: 35 mm.
- Weight: 109.3 g.

#### Mounting and connectivity

- Mount thread: M12 × P0.75 (compatible with M12 adapters and systems).

### COMPATIBILITY :

From iPhone 12 to the latest iPhone
