

## LENSULTRA 16MM WIDE ANGLE

Ultra wide angle lens for smartphones

REF : SC-LU-WD-016-23-EF

EAN : 0655729668033

EXISTS IN : BLACK

### DESCRIPTION :

The LensUltra 16mm is a premium wide-angle smartphone lens that expands your field of view to capture landscapes, architecture, interiors, and group shots with strong visual impact and minimal distortion. Compact and lightweight, it delivers crisp images thanks to its fluorite optics and multi-coating, making it perfect for travelers and creators who want wider scenes without hassle: mount, shoot, and share.

### STRENGTHS :

- Much wider field of view: capture larger scenes without having to step back.
- More dynamic compositions: the ultra-wide angle supports creative and dramatic framing.
- Maintains sharpness: designed to widen the frame without losing resolution or clarity.
- Controlled distortion: natural lines and minimal curvature for architecture and landscapes.
- Lightweight and portable: 76.6 g, ideal for travel or urban shoots without extra bulk.
- Durable construction: fluorite elements and aluminum body for long-lasting performance.
- Easy integration: M12 mount for adapters and compatibility with smartphone lens systems.

### CHARACTERISTICS :

- Type: wide-angle smartphone lens — LensUltra 16mm.
- Focal length: 16 mm.
- Field of view: 100° (ultra-wide).
- Magnification: 0.5× (captures roughly twice the framing area).
- Expanded field of view: 0.7× wider compared to the phone's standard lens.
- Distortion: ~ -1% (very well controlled for natural-looking images).
- Elements and coatings: fluorite glass with multi-layer anti-reflective (AR) coating.
- Body material: aluminum.
- Minimum focus distance: 70–90 mm.
- Mounting: M12 × P0.75 thread.

- Physical dimensions: length 26.4 mm.
- Weight: 76.6 g.

## COMPATIBILITY :

From iPhone 12 to the latest iPhone
