

FEEDER EBONY LITE

Smart feeder with solar camera, AI (6,000+ species), eco-friendly wood (ebony)

REF : BI-EPPAMBNI8702110

EAN : 0810198940480

EXISTS IN : BROWN

DESCRIPTION :

The Birdfy Ebony Lite is a smart bird feeder made from eco-friendly fir wood, featuring a 1080P camera and an adjustable solar panel. It can identify over 6,000 bird species with AI and provides an elegant, sustainable way to watch your backyard wildlife. With its exclusive ebony-style design, it makes an ideal gift for bird and nature lovers.

STRENGTHS :

- **Durable, eco-friendly wood:** crafted from environmentally friendly fir wood, this feeder naturally attracts wild birds. The sloped roof is coated with eco paint for waterproof durability, and the adjustable solar panel helps maximize solar charging without removing the feeder.
- **Real-time birdwatching:** connect to the Birdfy app to receive instant notifications when birds visit. Recordings are automatically saved to lifetime-free cloud storage with 30 days of data retention. Two-way audio lets you enjoy birdsong and scare away squirrels when needed.
- **AI bird identification:** powered by Birdfy's extensive bird database, advanced AI technology can accurately identify more than 6,000 bird species. Enjoy a 7-day free trial of this powerful AI recognition feature.
- **Full HD night vision:** the 1080P HD camera captures every movement by day and night with ultra-smooth live streaming. A 135° wide-angle lens provides a broad, immersive viewing experience.
- **Easy to install and clean:** the magnetic docking design makes camera installation and removal quick and effortless, while the simple body structure is easy to clean and maintain.
- **Warm tip:** works only with 2.4 GHz Wi-Fi networks and is not compatible with 5 GHz routers.

CHARACTERISTICS :

- AI recognition: 7-day trial

- Material: fir wood
- Bird seed capacity: 2.5 L (84 oz)
- Camera resolution: 1080P Full HD video
- Battery: 5000 mAh
- Charging: USB-C (Type-C)
- Network connection: Wi-Fi 2.4 GHz only
- Waterproof rating: IP66
- Operating temperature: -4°F to 122°F (-20°C to 50°C)
- Two-way audio: microphone & speaker
- Warranty: 2 years
