EAN : 6936685221529

EXISTS IN : BLACK, WHITE

DESCRIPTION :

GameSir G7 HE is a wired controller for Xbox and PC designed for serious gaming: precise, comfortable, and free from stick drift issues. Thanks to **Hall Effect** technology, both the sticks and triggers offer improved durability and optimal stability, making it ideal for FPS games, competitive play, and long gaming sessions.

It features front buttons with micro-switches for fast, crisp response on every press, along with two fully customizable rear buttons so you can perform combos faster or access functions without taking your thumbs off the sticks.

Its magnetic, removable front panel allows easy customization or even painting to match your style. With the **GameSir Nexus** software, you can adjust sensitivity, vibration, remap buttons, and save your own game profiles.

It connects via a detachable 3-meter USB-C cable and is plug-and-play ready on Xbox Series X|S, Xbox One, and Windows PC, with minimal latency and direct audio support through its 3.5 mm headphone jack.

STRENGTHS :

- Hall Effect technology: drift-free sticks with improved durability.
- Smoother and more precise analog triggers for shooting and acceleration.
- ABXY buttons with micro-switches: fast and tactile response.
- 2 configurable rear buttons for quick actions.
- Magnetic, removable front panel for customization or painting.
- Full customization via GameSir Nexus software (sensitivity, mapping, profiles).
- Compatible with Xbox Series X|S, Xbox One X|S, Windows 10/11, and Steam.
- Detachable 3 m USB-C cable connection, no lag and no batteries required.
- 4 vibration motors (grips and triggers) for enhanced immersion.

- 3.5 mm jack for connecting headphones directly to the controller.
