

GAMESIR G7 PRO TRI-MODE MECH WHITE

Xbox Wired, PC & Mobile Wireless Controller

REF : GS-GSG7XW001

EAN : 6936685222267

EXISTS IN : RED, WHITE, CAMEL, BLACK

DESCRIPTION :

The GameSir G7 Pro Tri-Mode is a premium controller built for playing anywhere: Xbox, PC, and mobile. It offers a wired connection for Xbox, along with 2.4G wireless or Bluetooth for PC and Android, so you can easily use it on your console, computer, or smartphone.

Its GameSir Mag-Res™ TMR sticks deliver smooth, precise control with an ultra-long lifespan. The triggers feature Hall Effect technology with micro-switch stops, providing faster and more consistent shooting, ideal for FPS and competitive games.

It includes 4 extra buttons (two rear buttons and two mini bumpers), perfect for assigning quick actions without taking your thumbs off the sticks. The ABXY buttons are optical with micro-switches, and the D-pad is mechanical, giving a crisp, tactile response with every press.

On PC, the controller reaches a 1000 Hz polling rate both wired and over 2.4G, minimizing input lag. It also features a gyroscope with mapping functionality (PC only), allowing you to aim by moving the controller—ideal for precision-based games.

It supports audio via a 3.5 mm jack in both wired and 2.4G modes, and includes a charging dock to keep its 1200 mAh internal battery ready at all times. The front faceplate is magnetic, split into three interchangeable parts, and compatible with G7 series faceplates.

STRENGTHS :

- **Tri-Mode: play on Xbox, PC, and mobile**
Wired for Xbox, 2.4G wireless and Bluetooth for PC and Android.
- **Ultra-durable Mag-Res™ TMR sticks**
Smooth, precise control designed for an ultra-long lifespan.

- **Hall Effect triggers with micro-switch stops**
Faster, more consistent shots with improved tactile feedback.
- **4 extra buttons for advanced control**
Two rear buttons (R4/L4) and two mini bumpers (R5/L5) for quick access and macros.
- **Precise, tactile buttons**
ABXY with optical micro-switches and a mechanical D-pad for better responsiveness.
- **Reduced input lag on PC (1000 Hz)**
1000 Hz polling rate via wired and 2.4G for near-instant response.
- **Built-in gyroscope (PC)**
Aim or control by moving the controller with gyro mapping functionality.
- **3.5 mm audio jack also in wireless mode**
Connect your headset via cable or 2.4G.
- **Charging dock included**
1200 mAh battery with docking station to keep it ready at all times.
- **Magnetic modular front faceplate**
Three interchangeable parts, compatible with G7 series faceplates.

CHARACTERISTICS :

- **Platforms:** Xbox Series X|S, Xbox One, PC, Android, Steam
- **Connectivity:**
 - Xbox: wired
 - PC: wired and 2.4G
 - Android: Bluetooth
- **Sticks:** GameSir Mag-Res™ TMR
- **Triggers:** Analog Hall Effect with micro-switch stops
- **Buttons:**
 - ABXY with optical micro-switches
 - D-pad with mechanical micro-switch
 - 4 extra (rear R4/L4, mini bumpers R5/L5) with locks
- **Vibration:** 4 motors
- **Audio:** 3.5 mm jack (works in wired and 2.4G modes)
- **Gyroscope:** Yes, with mapping (PC only)
- **Polling rate on PC:** 1000 Hz (wired and 2.4G)
- **Battery:** 1200 mAh, rechargeable
- **Charging dock:** Included
- **Software:** GameSir Nexus 2.0
- **Faceplate:** Magnetic, 3-piece design, compatible with previous G7 faceplates
- **Accessories:** Charging dock, 2.4G receiver, 2 D-pads, cable clip, 3 m USB-C cable
- **Size:** 152 × 103 × 58 mm / 5.98 × 4.06 × 2.28 in
- **Weight:** 392 g / 0.86 lb
