

GAMESIR G7 SE WHITE

Xbox controller with Hall Effect sticks

REF : GS-GSG700SE-1

EAN : 6936685220676

EXISTS IN : GREY, WHITE

DESCRIPTION :

The GameSir G7 SE is a wired controller for Xbox and PC designed for those who want precision and durability without the hassle. Its Hall Effect sticks eliminate drift and provide smooth, stable control, making it perfect for FPS games, competitive play, or long gaming sessions.

The triggers also use finely tuned Hall Effect sensors, giving you more precise control when accelerating, braking, or shooting. The front buttons are membrane-based, offering a comfortable and quiet feel, while on the back you'll find 2 additional fully configurable buttons. If you prefer not to use them, quick latches allow you to disable them instantly to prevent accidental presses.

The front shell is interchangeable and paint-friendly: you can easily remove it to paint or customize it and create a truly unique controller. With the GameSir Nexus software, you can adjust stick sensitivity, trigger travel, vibration, remap buttons, and save multiple game profiles that can be switched on the fly.

It connects via a detachable 3-meter USB-C cable (plug and play), and includes a 3.5 mm headphone jack along with a built-in microphone mute button. All of this comes in a lightweight and comfortable Sporty Gray finish.

STRENGTHS :

- **Drift-free Hall Effect sticks**

Improved durability and precision with no drift over time.

- **More precise analog triggers**

Hall Effect magnetic sensors for better control when shooting or accelerating.

- **2 configurable rear buttons**
Assign key functions and disable them instantly with dedicated latches.
- **Comfortable and quiet front buttons**
Membrane ABXY buttons, soft to the touch and ideal for long sessions.
- **Customizable front faceplate**
Interchangeable, paint-friendly faceplate to create your own design.
- **Instant profile switching**
Quickly switch between controller profiles depending on the game.
- **Advanced customization with GameSir Nexus**
Adjust sensitivity, vibration, button mapping, and save multiple profiles.
- **Stable, lag-free wired connection**
Detachable 3 m USB-C cable, plug and play, no batteries or charging required.
- **Immersive 4-motor vibration**
Motors in each grip and trigger for a more realistic experience.
- **Direct audio from the controller**
3.5 mm jack and mute button for quick voice chat control.
