

GAMESIR G7 PRO 8K PC AIMLABS EDITION

Esports Controller for PC

REF : GS-GSG7CEAS001

EAN : 6936685224100

EXISTS IN : BLUE, GOLD, BLACK

DESCRIPTION :

GameSir G7 Pro 8K: the controller that combines performance and simplicity for every player. Enjoy exceptional responsiveness thanks to a polling rate of up to 8,000 Hz (wired and 2.4G) and contactless GameSir Mag-Res™ TMR Gen-2 sticks designed to reduce drift and ensure long-lasting precision. Whether you play casually or chase every millisecond of advantage, the G7 Pro 8K delivers.

Customize your gameplay instantly: dual-mode triggers (Hall Effect or micro-switch), four reconfigurable macro buttons (including two lockable back buttons), optical ABXY and a mechanical D-pad for ultra-responsive inputs. The 6-axis gyroscope, two asymmetric rumble motors and 3.5mm audio output enhance immersion, while GameSir Connect lets you fine-tune mappings, macros and feel. Comfortable, robust and ready for action.

STRENGTHS :

- **Officially licensed accessory:** An Aimlabs-licensed accessory. Developed in collaboration with Aimlabs, this controller pairs the iconic cyan design with pro-level performance meeting Aimlabs standards—favored by competitive players.
- **Polling rate:** 8,000 Hz on both wired and 2.4G wireless connections, delivering smoother control and instant responsiveness for e-sports level play.
- **Sticks:** GameSir Mag-Res™ TMR Gen-2 sticks — magnetic, contact-free technology to eliminate drift, provide smooth linear control, ultra-low power consumption and long-lasting stability.
- **Dual-mode triggers:** Switch between Hall Effect analog triggers (precise linear input) and micro-switch triggers (instant actuation), letting you choose between fine control and maximum responsiveness.
- **Four reconfigurable macro buttons:** Including two lockable back buttons and two mini bumpers; each supports up to 32 macro recording steps for fast in-game execution.

- **Ultra-fast activation buttons:** ABXY with optical micro-switches for instant activation and exceptional durability; mechanical micro-switch D-pad for precise, reliable directional input.
- **Motion control:** Built-in 6-axis gyroscope to enhance aiming and fine control, adding flexibility for competitive and immersive gameplay.
- **Rumble motors:** Two asymmetric motors in the grips for immersive, realistic haptic feedback; instant start/stop circuitry produces crisper, more accurate vibrations.
- **3.5mm audio support:** 3.5mm audio output supported via wired and 2.4G wireless connections for convenient, immersive audio.
- **eSports-level customization:** Fully customize performance, button mapping and macros with GameSir Connect software, designed for competitive control and tuning.

CHARACTERISTICS :

- **Working Platform:** PC
- **Connection:** Bluetooth, 2.4G wireless and wired USB-C
- **Sticks:** GameSir Mag-Res™ TMR Gen-2
- **Triggers:** Hall Effect analog triggers with Micro Switch trigger stops
- **ABXY:** Optical Micro Switch
- **D-pad:** Mechanical Micro Switch
- **Rumble Motors:** Two asymmetric motors built into the grips, with instant start/stop circuitry
- **Macro Buttons:** Four (R4/L4 back buttons and R5/L5 mini bumpers)
- **Back Button Latches:** Yes
- **3.5mm Audio Jack:** Yes, supported in wired and 2.4G wireless modes
- **Motion Control:** Yes, 6-axis gyroscope
- **Turbo:** Yes, adjustable on three levels: 10 Hz / 20 Hz / 30 Hz
- **Battery:** 1200 mAh
- **Charging Station:** Included
- **Customization Software:** GameSir Connect
- **Faceplate:** Three-part magnetic swappable design, supporting customizable configurations
- **Product Size:** 5.98 x 4.06 x 2.28 in
- **Net Weight:** 0.86 lb
