

GAMESIR T7 PRO RETRO GREEN

Controller with Hall Effect sticks for Xbox and PC

REF : GS-GST7PG001

EAN : 6936685223370

EXISTS IN : GREEN, GREEN

DESCRIPTION :

The GameSir T7 Pro is a wired controller for Xbox and PC that combines pro-level performance with a striking transparent floral design. Its Hall Effect sticks are anti-drift and highly durable, ensuring consistent precision for aiming and movement even after long gaming sessions.

The triggers also use Hall Effect technology and feature two-stage trigger stops: full travel for more control or short travel for faster shooting in FPS and competitive games. The ABXY buttons and D-pad are membrane-based, offering durability and comfort for extended play.

The transparent shell with kaleidoscope-style RGB lighting makes the controller stand out in any setup: the buttons, sticks, D-pad, and rear grips are all illuminated. It also includes two mappable rear buttons so you can assign key actions (jump, reload, weapon switch, etc.) without taking your thumbs off the sticks.

The grips feature laser-textured anti-slip surfaces for a secure hold. It connects via a detachable 3 m USB-C cable and works plug-and-play on Xbox Series X|S, Xbox One, Windows 10/11, and Steam. With the GameSir Nexus app, you can customize buttons, sensitivity, vibration, and RGB lighting to your preference.

STRENGTHS :

- **Anti-drift Hall Effect sticks**

Greater precision and durability, preventing drift over time.

- **Hall Effect triggers with 2-stage stops**

Choose between full or short travel for faster shooting.

- **Transparent floral design with kaleidoscope effect**

A unique and eye-catching look for your setup.

- **RGB on buttons and grips**

Lighting on ABXY, D-pad, sticks, and rear grips.

- **Two mappable rear buttons**

Assign key actions without letting go of the sticks.

- **Durable membrane buttons**

Comfortable and long-lasting ABXY and D-pad for extended sessions.

- **Ergonomic anti-slip grips**

Laser-etched texture for a better hold.

- **Stable wired connection with zero lag**

3 m detachable USB-C cable, no batteries or charging needed.

- **Immersive 4-motor vibration**

Motors in grips and triggers for more realistic feedback.

- **Customization with GameSir Nexus**

Adjust mapping, sensitivity, vibration, and RGB lighting via software.
