STARLINK CABLE 12V/24V

Kevlar power cable for Starlink Mini

REF : NM-NM011307858

EAN : 856504011307

EXISTS IN : BLACK

DESCRIPTION :

A double-braided Kevlar® outer weave resists harsh wear, while 50 feet of reach allows you to chase the strongest signal. Highly efficient power delivery keeps your Starlink running without draining your vehicle's battery. Just plug Starlink Cable into any 12V or 24V vehicle socket and connect the other end to your Starlink Mini—simple as that. No tools, no fuss, just instant access to a reliable internet connection.

Heavy-duty copper wiring delivers steady, efficient power in demanding outdoor conditions, while built-in temperature regulation helps keep your Starlink Mini running smoothly without drops or interruptions. An aluminum adapter adds a clean, premium look to your dashboard, while a silicone gasket on the other end of the cable creates a secure, weather-resistant connection. A durable silicone tie keeps the cable tidy when it's packed away.

STRENGTHS :

- Powers Starlink Mini
- Highly efficient 12V aluminum adapter
- Kevlar®-reinforced cable
- Custom silicone cable tie
- 15m / 50ft reach

CHARACTERISTICS :

Materials

- Kevlar® 29 (K29) Aramid Fiber & nylon outer weave
