PANEL HUB S1 PLUS EU DESKTOP VERSION

Smart Home Control Panel, Compatible with Zigbee and Matter, Device Control and Energy Monitoring with LCD Screen and Camera Streaming

REF : AQ-MP-K05D

EAN : 6975833359127

EXISTS IN : WHITE

DESCRIPTION :

The Panel Hub S1 Plus EU (Desktop Version) is a full-screen desktop control panel with built-in Siri voice control. Its modular design allows it to be installed either on the wall or as a freestanding unit, extending smart control to any surface: desks, bedside tables, coffee tables, etc. It provides a more convenient touch experience, allowing you to control multiple devices and scenes to create a seamless and comprehensive smart home management system, accessible at your fingertips.

STRENGTHS :

- **All-in-one control panel** : equipped with 2 wired switches and 6 wireless switches, it lets you control Aqara devices by adjusting lighting, blinds, cameras, sensors and thermostats using on/off controls and customizable settings such as color temperature (CCT/RGB) and temperature. ** This feature may not be available in some third-party Matter ecosystems, but it is already supported by the device. To ensure this feature, we recommend connecting the device to the Aqara Home app.*
*** It can control up to 60 compatible Aqara devices on a single dashboard (maximum number of dashboards: 10). Dashboard configurations can be copied from your Aqara Home app to the panel. Available Aqara device types and models may vary depending on current compatibility.*
- **Matter bridge and Zigbee 3.0 hub** : the smart panel can be used as an Aqara Zigbee hub, supporting dual-band Wi-Fi (2.4 GHz and 5 GHz), and connecting devices to Matter ecosystems such as Apple Home, Alexa, Google Home, etc., without requiring an additional hub. ** To use the device with a specific Matter ecosystem, a controller for that ecosystem is required.*
- **Video streaming** : stream video feeds from Aqara cameras, manage streams, automate actions, and unlock Aqara smart locks to enhance security and convenience through intuitive controls.
- **Customizable dashboard** : the panel supports up to 10 customizable dashboards, allows easy switching between them, supports copying from the Aqara Home app, and offers smooth organization tailored to your preferences and home setup.
- **Power consumption tracking** : the panel lets you monitor your electricity use by displaying daily, weekly, or monthly consumption of connected devices, which is ideal for reducing usage and promoting sustainable energy habits.
- **Proximity wake-up** : this feature turns the screen on when someone approaches, making your home smarter and more interactive. It also supports automatic screen brightness adjustment for optimal visibility and improved energy efficiency, delivering a smarter home experience. ** The proximity trigger distance can be set to one of ten available levels, from near to far. The distance adjustment function will only be available in the Aqara Home app.*

CHARACTERISTICS :

Name : Panel Hub S1 Plus EU

Wireless protocol : Wi-Fi IEEE 802.11 a/b/g/n/ac 2.4GHz/5GHz, Zigbee IEEE802.15.4, Bluetooth

Resolution : 1440 × 720

USB-C input : 5V ? 2A

Dimensions : 172.6 × 100.5 × 89.8 mm

Net weight : 521 g

Packaging size : 191 × 110 × 104 mm

Gross weight : 792 g

Operating temperature : -10 °C ~ 40 °C

Supported humidity : 0 - 95% RH, non-condensing

Box contents : Panel Hub S1 Plus × 1, User Manual × 1, Certificate of Conformity × 1, Screw Kit × 2
