

SLIM EX1 WIRELESS QWERTY KEYBOARD SPACE BLACK

Wireless keyboard recommended for macOS and Microsoft Surface, supplied with a 2.4 GHz USB receiver for instant switching

REF : SA-ST-KEX1C-EN

EAN : 0810086363001

EXISTS IN : BLACK, WHITE

DESCRIPTION :

Designed for modern offices that demand clarity and calm, the SlimEX1 brings precision and simplicity to your workspace in a carefully considered form. Its compact design saves space while preserving a natural typing feel. Thanks to a physical operating system selector for instantly changing layouts, three Bluetooth channels, and a 2.4 GHz receiver, you can switch between MacBook, iPad, iPhone, or PC without re-pairing.

Low-profile, quiet scissor keys and a durable metallic finish reflect the EX1 design language: a compact form made for focus. Over the long term, a powder-coated metal base and UV-protected keycaps stand up to years of use, while a removable 450 mAh battery supports the EU's 2027 repairability goals. And with Bluetooth 5.3, a reliable 10 m (30 ft) range, or fast 2.4 GHz response, the EX1's responsiveness is instant, anywhere.
