

ENOCEAN IN-WALL MODULE

1*2.3KW

EnOcean In-Wall Module 1 channel

REF : NO-SIN-2-1-01

EAN : 3700313921425

EXISTS IN : OTHERS

DESCRIPTION :

CHECK EVERYTHING YOU WANT FROM A SIMPLE ACTUATOR

Control everything you want from a simple actuator: lights, radiators, boiler, garage door, etc ... and finally transform your home into a connected home. Compatible with the EnOcean® global protocol for home and connected building, this EnOcean® 1-channel Recessed Module can be installed in your ceiling, or behind an electrical outlet to make your devices connected. With its 2300W switching capacity and potential-free input, make your home connected without changing any of your devices.

With this module I can:

- Control the access of my house, like the garage door, thanks to its free entrance
- Turn on / off my devices remotely, directly from the wall.
- Control my boiler and my central heating, thanks to its potential free entrance
- Transform my electrical outlet into a remotely connected, controllable jack

STRENGTHS :

- **HIGH SWITCHING CAPACITY:** With its capacity of 2300W you can turn on / off almost all your devices.
- **ULTRA COMPACT PROFILE:** This 2-channel Recessed Module is a concentrate of technology and functions, in less than 17mm thick.
- **FREE POTENTIAL ENTRY:** No matter what you plug in, the EnOcean® 1-Channel Recessed Module will make it connected. The possibilities are endless, from light control, to the boiler or the garage door.

- REMOTE COMMISSIONING: Using the latest EnOcean® specifications, the NodOn® Recessed Module can be installed without any physical technician.

CHARACTERISTICS :

Power supply : 230V AC +/-10% - 50Hz

Maximum output power: 1*2.3kW

Self-consumption: <1W

Operational temperature – 0°C to 40°C - Altitude – 2.000m

EnOcean® radio protocol : 868.3MHz Bidirectionnal - EEP : D2-01-0E

Range: 30m

2 inputs for existing wired wall switch(es)

Dimension – 40*45*16,9mm
