DESCRIPTION :

Level up with the 200W 6-Port USB-C PD GaN Charger by Satechi. This elegant yet powerful charger allows you to charge up to 6 devices simultaneously driven by industry-leading GaN technology for a fast, reliable, and safe charge. By swapping out silicon for gallium nitride (GaN), we've reduced the size of our chargers without compromising power. Equipped with 6 USB-C PD ports to support multiple power configurations up to 200W, this charger is the perfect solution to power up your power-hungry devices.

STRENGTHS :

- Equipped with 6 USB-C PD ports (2x USB-C PD 3.1 and 4x USB-C PD 3.0) with power distribution that detects each device being connected and adjusts wattage according to the port hierarchy, supporting a total power output of 200 watts combined. You will be able to achieve 140W when 1 device is connected to PD1 or PD2, or the port hierarchy of 65W/45W/20W/20W/20W/20W when all 6 ports are being utilized. Supports PD 3.1/3.0, QC 4.0+, and PPS.

- Features next-gen Gallium Nitride (GaN) technology, about three times as efficient as silicon-based chargers in converting power to electricity, to provide faster charging and better overall power efficiency.

- Includes CE & ETL certifications along with over-current protection to provide an efficient and safe charge for your connected devices. We recommend using certified charging cables (sold separately) to ensure utmost safety to your host device.

- Its modern space gray design complements any workspace with a detachable power cord for easy storage.
