CHARACTERISTICS :

"

How the ClickLock locking system works?

- CASES: A recessed receptacle is located over the MagSafe indexing magnet.

- **ACCESSORIES:** An extendable bolt is attracted by the MagSafe magnets into the ClickLock receptacle, preventing slipping due to shear force.

The Beauty of the Click Lock System:

- *ClickLock Case + AnyBrand MagSafe Accessory:* When used with a non-ClickLock accessory, a ClickLock phone case works just like any other case.
- *Any MagSafe Case + Speck ClickLock Accessory:* When a ClickLock accessory is used with a non-ClickLock case, it works just like any other case & accessory.
- *Speck ClickLock Case + Speck ClickLock Accessory:* When a ClickLock accessory is used with a ClickLock case, ***the combination make the strongest, no-slip connection.***

"

COMPATIBILITY :

MagSafe, iPhone 15 Pro
