DESCRIPTION :

Chic, small and multifunctional

Tivoli Audio's Music System+ is just like a complete hi-fi system, yet very small and above all absolutely admirable. Forget separate loudspeakers, say goodbye to cables lying on the floor, and enjoy the incredible sound of this beautiful, compact, handcrafted, genuine wood cabinet. With a powerful built-in speaker, the sound quality of the subwoofer is legendary. The Music System+ plays your favorite CDs, and can also connect to the latest Bluetooth-equipped audio devices, such as smartphones. It also receives FM/AM radio broadcasts, so you can listen to all your favorite stations at all times.

Import your music

?Nowadays, music is increasingly stored on all kinds of computers, tablets and smartphones. The Music System+ is equipped with Bluetooth wireless technology, which means you can connect any suitably equipped device without having to make any connections. Simply make the connection - it's very easy and explained in detail in the manual - then relax and enjoy your digital music thanks to the Music System+'s superb speaker system.

A sound investment

?For many, the obvious beauty of the Music System+ lies in its hand-crafted real wood case, but a glance inside reveals other wonders: this compact Tivoli incorporates an incredibly efficient audio system, comprising two powerful amplifiers connected to the speakers in stereo, plus a subwoofer set in a low chassis. You can tailor the treble and bass to suit your direct environment, as well as access equalizer settings on the supplied remote control. The result is performance that will bring you complete satisfaction in the years to come, and you can relax in the knowledge that this system is totally future-proof.

Piece of furniture?

It's as much a decorative object to be admired as it is a sound system to be listened to. The Music System+ embellishes your home with a wooden cabinet of the same quality as the furnishings. It's as much an eye-catcher as it is a delight to the touch.
