AM/FM radio

REF : TI-M1SLB

EAN : 0850003501789

EXISTS IN : BLACK, BROWN, SILVER, RED, WHITE

DESCRIPTION :

The Ideal Radio

Where performance and simplicity are paramount, but space is scarce, our original Model One tabletop radio offers a quality experience that has been entertaining homes and offices for decades.

Analog Bliss

With just three buttons, it's the antithesis of today's increasingly complex electronic products. The simple appearance of the Model One conceals high-quality analog craftsmanship, facilitating better sound reproduction and radio reception.

STRENGTHS :

Design

The Model One radio begins with a handcrafted wooden cabinet, both beautiful and the ideal inert acoustic enclosure, shaping Tivoli Audio sound. The speaker grille form factor and control knobs are proportionately arranged, providing a balanced look and feel. Available in various finishes.

Sound

A natural replica of sound. This single mono speaker delivers true artistry of analog audio. A long-throw, heavy-magnet driver is coupled with a frequency contouring circuit that automatically adjusts output in half-octave increments, resulting in musically precise tonal balance and bass response.

Controls

Simple convenient controls to deliver exactly what you want. One button for your power source, one button for volume, a 5:1 tuning ratio dial to help you pull in even the faintest stations.

Playback

The Model One radio provides FM/AM radio playback. If you wish to listen to your own music, you can easily plug in an audio

device via the radio's auxiliary input. Want to listen more intimately? Plug your headphones into the headphone jack on the rear panel.
