

Aqara

VIBRATION SENSOR

Precise motion and vibration detection for home security

REF : AQ-DJT11LM

EAN : 6970504212527

EXISTS IN : WHITE

DESCRIPTION :

The Aqara Vibration Sensor is equipped with a high-precision acceleration sensor, capable of detecting vibrations and object movements. It communicates with the Hub using the Zigbee protocol and works with other smart accessories to create various automated scenes. For example, it can trigger a local or remote alarm when it detects a broken window.

VIBRATION DETECTION: Whenever the Aqara Vibration Sensor detects unexpected vibrations, it will send alerts to your phone or trigger the local alarm on the Aqara Hub.

MULTIPURPOSE MOTION DETECTION: The Aqara Vibration Sensor can also detect tilt and drop movements when attached to an object. This means you can attach the sensor to valuables or drawers and be notified if movement is detected.

HOME AUTOMATION: The Aqara Vibration Sensor can be configured to control and trigger other connected Aqara devices when vibrations or movements are detected.

EASY INSTALLATION: No wiring or screws required.

AN AQARA HUB IS REQUIRED AND SOLD SEPARATELY.

Requires a secure 2.4 GHz Wi-Fi network connection. The Aqara Hub M2 or M1S can connect up to 128 devices (*using a repeater such as the Aqara Smart Plug or Aqara Smart Wall Switch (with neutral) is required).

STRENGTHS :

- **Designed to Fit Various Places:** Aqara Vibration Sensor can be placed anywhere according to your needs, guarding your home.
- **Smart Control in Apple Home App:** Aqara Vibration Sensor works with other HomeKit-enabled accessories in Home to make your life easier.

- **Security Notification:** When vibration, tilt or drop is detected, Aqara Vibration Sensor will trigger the Hub to sound an alarm and send a notification to your phone.
- **Aqara Home Automation:** You can customize different scenes with our suite of smart home products. Even if the Wi-Fi connection is unstable or disconnected, as long as the Hub is powered, local automations associated with this product still work properly.
- **Advanced Technology:** Aqara Vibration Sensor is embedded with a high precision acceleration sensor. The shell is made of anti-UV material and the color will not fade allowing for long-term usage. It consumes low energy and one button battery lasts about 2 years.

CHARACTERISTICS :

- Battery: CR2032
- Wireless Protocol: Zigbee
- Dimensions: 36 x 36 x 9 mm
- FCC ID: 2AKIT-DJT11LM
- IC: 22635-DJT11LM
- Operating Temperature: -10?~+45? (14?~113?)
- Operating Humidity: 0 - 95%RH, non-condensing
- What's in the Box: Vibration Sensor x 1, Sticker x 1, Quick Start Guide x 1
- App: Apple Home app (iOS 10.3 or later), Aqara Home app (Android 5.0 or later, iOS 10.3 or later)
