DOOR AND WINDOW SENSOR T1

Door and Window Sensor with Open Detection and Alarm

REF : AQ-DW-S02D

EAN : 6970504219649

EXISTS IN : WHITE

DESCRIPTION :

The Aqara Door and Window Sensor detects the open and close state of doors or windows through the distance between the sensor unit and the magnet. It consumes a very small amount of energy. No tools required, simply peel and stick it to the desired location.

Proximity: For a solid connection, make sure the Aqara Door and Window Sensor is within 400 inches of the Aqara Hub Zigbee, and that the hub is within the same range of the Wi-Fi router. Also, ensure that both the hub and router are on the same local network (LAN).

Unauthorized Entry Detection & Home Automation: The Aqara Door/Window Sensor alerts your phone and triggers the local alarm on the Aqara hub in case of unexpected door/window openings. It also controls other Aqara devices based on the door/window state. Set up automations in the Aqara Home app, for example, with the Aqara Hub, when you open the door in the evening, the Aqara Door and Window Sensor will send a signal to the Aqara Wall Switch to turn on the lights.

0.86 Inch Authorized Gap: The Aqara Door and Window Sensor works with most types of doors, windows, and other devices with similar mechanisms, such as drawers, cabinets, and more. (Note: Please ensure that the surface where you plan to stick the Aqara Door and Window Sensor is flat and easily adhesive, and the authorized gap between the door is up to 0.86 inch.)

Voice Control: Compatible with Apple HomeKit, Alexa for a hands-free experience. (Note: a. Please connect the Aqara Door and Window Sensor to the Aqara Hub before connecting it to Apple HomeKit or enabling skills in Google Home and Alexa. b. The Aqara Door and Window Sensor is not currently compatible with SmartThings.)

An Aqara Hub is required and sold separately.

(Note: Does not support hubs from other brands.) Requires a secure 2.4 gigahertz Wi-Fi connection for Hub M2/ M1S/ E1/M1S Gen2 and Camera Hub G2H Pro/ G2H, and Wi-Fi 2.4/ 5 GHz for Camera Hub G3. (Wired connection via Ethernet RJ45 for Hub M2 is also supported.)

STRENGTHS :

- **A Smart Sensor for Every Door and Window:** For an added peace of mind, install the Aqara Door and Window Sensor so you will never have to worry about the status of your doors and windows.
- **Smart Control in Apple Home App:** Works with other HomeKit-enabled accessories in Apple Home to make your life easier.
- **Aqara Home Automation:** You can customize different scenes with our suite of smart home products. For example, when you open the door in the evening, the Aqara Door and Window Sensor will send a signal to the Aqara Wall Switch to turn on the lights. No matter how late you get home, the lights will automatically turn on.
- **Security Notification:** With the Door and Window Sensor, you can turn on alarm mode when you leave the house or when you are asleep. If a door or window is opened, the Hub will sound an alarm and send a notification to your phone.
- **Advanced Technology:** Aqara Door and Window Sensor detects the current status of doors or windows via the distance of the magnets inside the sensors between the sensor and the magnet. The sensor is also energy efficient and one battery can last over 2 years under normal usage.

CHARACTERISTICS :

- **Couleur:** Blanc
- **Hub requis ?:** OUI (HUB AQARA)
- **Humidité d'exploitation:** 0 - 95 % HR, sans condensation
- **Dimensions du produit:** 1.61*0.87*0.43 pouce (41 × 22 × 11 mm) & 0.79*0.39*0.39 pouce (20 × 9.91 × 9.91 mm)
- **Poids net de l'article:** 0,034 livres/15,5 g
- **Appareils compatibles:** Aqara, Apple Home, Alexa, IFTTT
- **Composants inclus:** Unité de capteur x 1, aimant x 1, autocollant x 2, guide de démarrage rapide x 1
- **Protocoles sans fil:** Zigbee
- **Utilisation:** Utilisation en intérieur
- **Batteries:** Lithium métal (CR1632, inclus)
