

ZIGBEE THERMOSTATIC RADIATOR VALVE

Zigbee solution for radiator thermal regulation with remote control

REF : NO-TRV-4-1-01

EAN : 3700313926178

EXISTS IN : WHITE

DESCRIPTION :

Take control of your heating and save energy with the Zigbee thermostatic valve head. Combined with a compatible Zigbee Gateway 3.0, you can define intelligent programmes or scenes for greater comfort.

STRENGTHS :

- **ENERGY SAVINGS**

Schedule heating time slots* or create automated scenarios based on your lifestyle to reduce energy consumption.

- **KEY LOCKING**

Prevents unauthorized or accidental temperature adjustments.

- **EASY INSTALLATION**

Compatible with most radiators and easy to install.

- **OVER THE AIR (OTA) UPDATE**

The Zigbee thermostatic valve head can be quickly updated via OTA functionality. Updates can be performed through a compatible smart home hub.

CHARACTERISTICS :

- **Power supply:** 2 × 1.5 V AA/LR6
- **Compatible nut:** M30 × 1.5 mm
- **Control range:** 8-28°C
- **Adapters:** RA, RAV, RAVL
- **Radio protocol:** Zigbee 2.4 GHz
- **Max radio power:** +8 dBm

- **Device ID Type:** Thermostat (0x0301)
- **Range:** Up to 30m indoors
- **Protection rating:** IP20
- **Operating environment / Temperature:** 0-50°C
- **Dimensions:** 62 x 68 x 83 mm
- **Weight:** 230 g (batteries included)
- **Commercial warranty:** 2 years
- **Note:** Requires a Zigbee-compatible smart hub. The Zigbee thermostatic valve head works only with a Zigbee-compatible smart hub (automatic or remote control). List of compatible smart hubs available at www.nodon.fr
