

SMART PET FEEDER C1

The smartest pet feeder for cats and small dogs

REF : AQ-PETC1-M01

EAN : 6970504218178

EXISTS IN : WHITE

DESCRIPTION :

The Smart Pet Feeder C1 is not just an ordinary pet feeder with scheduling function: it always stays connected to your smart home system via Zigbee, runs local automations and acts as a repeater.

STRENGTHS :

- **Wide Compatibility:** Can be integrated with most popular ecosystems or controlled by voice assistants: Siri, Alexa, Google, IFTTT can be configured to control the Pet Feeder C1. Please note: this device is NOT HomeKit or Alexa compatible. However, it can be controlled by voice thanks to Aqara Home scenes. For more info, please refer to the product video.
- **Zigbee 3.0 Protocol:** Enjoy the benefits of the fastest, most stable, and energy-efficient smart home technology. Better stability and compatibility (more standardized protocol), longer support, and more features.
- **Scheduled and Remote Feeding:** The Pet Feeder always stays connected to your Aqara hub, can be controlled remotely even when you are hundreds of miles away, and supports feeding plans or schedules.
- **Smart Home Automations:** Only automations make a connected product truly smart: in Aqara Home, you will be able to make automations with other sensors and controllers, and dispense the food as many times a day as you wish.
- **Feeding Statistics in Grams:** As each kind of pet food is not the same, with C1 you will be able to see how many grams of food was consumed per day (you will have to weigh one portion and input the value in grams to the device settings). Like this, you will be able to access feeding statistics, and dispense as much food as per your pet's need.
- **Optional Battery Backup and Local Automations:** Apart from powering from USB-A port, the Pet Feeder C1 supports an optional D-type (LR20) battery backup. In contrast to other feeders, it stays connected even when powered from batteries! Also, compared to competition, the C1 will keep feeding according to the schedule even after the hub or internet connection goes down.

- **Zigbee Repeater (Router):** The Pet Feeder C1 can reinforce your Zigbee network by acting as a repeater. Remote Aqara Zigbee devices that sometimes could not reach the hub will reconnect to it automatically.

CHARACTERISTICS :

- Dimensions: 193 x 193 x 312 mm
- Rated Current: 1A
- Rated Voltage: 5V
- Rated Power Input: 5W
- Operating Humidity: 0-95% RH, no condensation
- Wireless Protocol: Zigbee
